## About Me

Hey, My name is Brayn Lin, Graduate from Chin-Yi University with Electronic Engineering degree.

My parents divorced when I was 10. That time was tough for me, but I knew that would be fine if I kept positive and kept moving. When I was a child, I was so interested in assembling desktops and found the solution that I was met, When I solved the problem perfectly, I felt a lot of accomplishment.

I am interested in learning everything, although my experience isn't comprehensive for now, but I will keep improving my skills and push myself to a higher level.
